DockForgeAI v2 Multi-source Experimental Dataset

Dataset curation only; no model performance or therapeutic activity is claimed.

Source overview

See machine-readable manifests and exclusion tables for details.

Target identity

See machine-readable manifests and exclusion tables for details.

Measurement types

See machine-readable manifests and exclusion tables for details.

Active/inactive definitions

See machine-readable manifests and exclusion tables for details.

Unit conversion

See machine-readable manifests and exclusion tables for details.

Structure standardization

See machine-readable manifests and exclusion tables for details.

Duplicate handling

See machine-readable manifests and exclusion tables for details.

Conflict handling

See machine-readable manifests and exclusion tables for details.

External overlap exclusion

See machine-readable manifests and exclusion tables for details.

Class balance

See machine-readable manifests and exclusion tables for details.

Source balance

See machine-readable manifests and exclusion tables for details.

Assay balance

See machine-readable manifests and exclusion tables for details.

Scaffold diversity

See machine-readable manifests and exclusion tables for details.

Split integrity

See machine-readable manifests and exclusion tables for details.

Readiness decision

See machine-readable manifests and exclusion tables for details.

Limitations

See machine-readable manifests and exclusion tables for details.

Reproducibility

See machine-readable manifests and exclusion tables for details.
